

From small beginnings in the mid 1980's IFEES has established itself as an internationally recognised body articulating the Islamic position on environmental protection.

We take a practical approach to resolving current issues.

This web site may be seen as evidence of its purpose and intentions.

THE FOLLOWING IS A PRESENTATION OF OUR VISION AND OBJECTIVES

Islamic Foundation for Ecology
and Environmental Sciences

المؤسسة الإسلامية للعلوم البيئية وعلوم الطبيعة

VISION

Our vision is to -

Work towards the revival of Islamic environmental norms through programmes designed to –

- Increase knowledge and awareness of Islamic teachings that address this subject
- Change attitudes and behaviour that cause major environmental problems such as climate change deforestation, desertification, pollution, and environmental destruction
- Alleviate poverty through projects specially designed to deal with sustainability issues

OBJECTIVES

We aspire to make a major contribution -

To the global campaign for environmental responsibility by

- **Developing an Islamic Science of natural resources management**
- **Developing education and training programmes**
- **Developing and implementing sustainable projects in key locations**
- **Developing networks of Muslim environmental activists world wide**

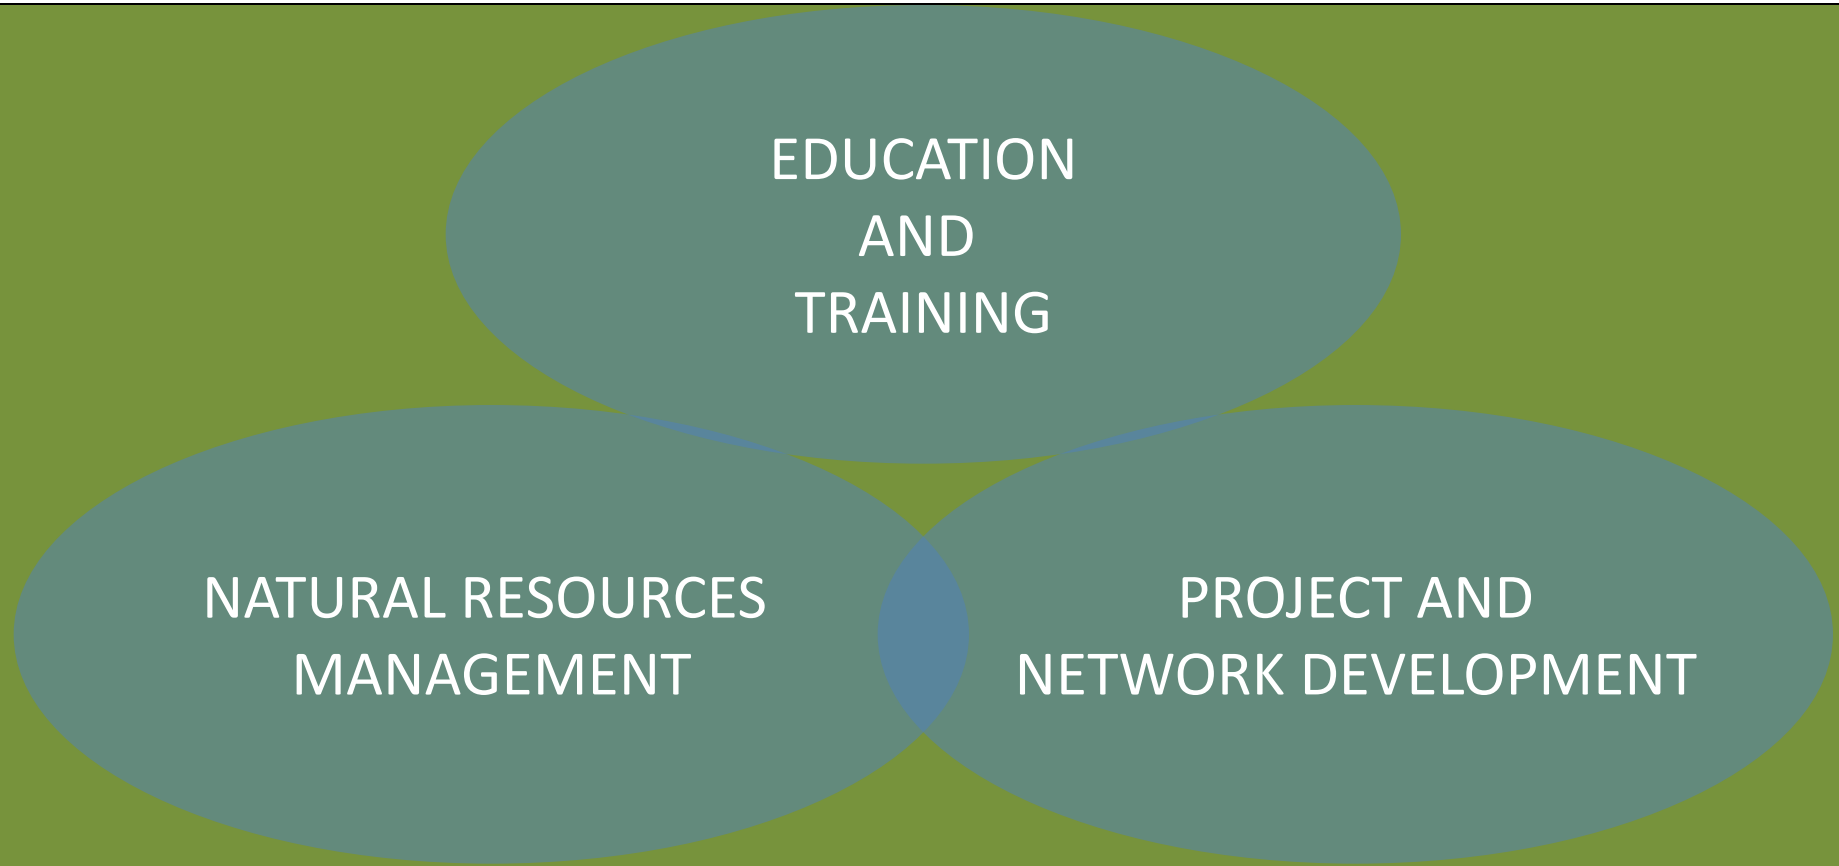

**Islamic Foundation for Ecology
and Environmental Sciences**

المؤسسة الإسلامية للبيئة و علوم البيئة

AN INTEGRATED STRATEGY

Our strategy is based on a holistic approach to the human connection to the natural world

**Islamic Foundation for Ecology
and Environmental Sciences**

المؤسسة الإسلامية للعلوم البيئية وعلوم الطبيعة

DEVELOPING A SCIENCE OF ISLAMIC NATURAL RESOURCE MANAGEMENT - I

We have pioneered the use of the Qur'an in establishing ground **breaking projects**
in various parts of the world

ILM UL KHALQ KNOWLEDGE OF CREATION

Islamic Foundation for Ecology
and Environmental Sciences

المؤسسة الإسلامية للعلوم البيئية وعلوم الطبيعة

DEVELOPING A SCIENCE OF ISLAMIC NATURAL RESOURCE MANAGEMENT - II

We work with scholars world wide in exploring the shariah and the fiqh on
an Islamic approach to the human relationship with the natural world

FIQH AL BI'AH Islamic jurisprudence on the environment
